Index of Multiple Deprivation (IMD)

The following visualisations draw upon data from the Index of Multiple Deprivation (IMD) to give insight into vulnerable populations in North Northamptonshire, West Northamptonshire, England. The Indices of Deprivation 2019 are a relative measure of deprivation for small areas (Lower-layer Super Output Areas) across England. The overall Index of Multiple Deprivation 2019 combines together indicators under seven different domains of deprivation: Income Deprivation; Employment Deprivation; Education Skills and Training Deprivation; Health Deprivation and Disability; Crime; Barriers to Housing and Services and Living Environment Deprivation. A higher score indicates that an area is experiencing high levels of deprivation.

The table below shows the IMD score and rank (average LSOA Rank, where a lower rank indicates that an area is experiencing high levels of deprivation) for North Northamptonshire, West Northamptonshire and England.

North Northamptonshire has an IMD score of 19.60. This means that North Northamptonshire has higher levels of deprivation to West Northamptonshire (17.68) and lower levels of deprivation to England (21.76).

The bar chart below explores this further, showing the proportion of people living in neighbourhoods grouped into deciles according to level of deprivation derived from the IMD. A higher score on the IMD indicates that an area is experiencing greater levels of deprivation. To clarify, all neighbourhoods in England are grouped into ten equal sized groups “deciles”; neighbourhoods in decile 1 fall within the most deprived 10% of neighbourhoods nationally, whilst neighbourhoods in decile 10 fall within the least deprived 10% of neighbourhoods nationally.

Communities and Environment

The following data is a summary of key indicators related to the community and environment.

The first chart below shows the Community Needs Index score. The Community Needs Index was developed to identify areas experiencing poor community and civic infrastructure, relative isolation and low levels of participation in community life. A higher score on this measure indicates that an area has higher levels of community need.

North Northamptonshire has higher levels of overall need on the Community Needs Index (an overall CNI score of 80.76) than West Northamptonshire (55.94) and higher levels of need than England (65.55).

Please note that the Civic assets score is displayed in a second, separate, bar chart just below as the scores for this domain are often much lower than the other domains and therefore the indicator is best shown using its own y-axis.

The table below shows the Indices of Deprivation Air Quality Measures. For each pollutant the atmospheric concentration was compared to a national standard value, with the concentrations in each Lower-layer Super Output Area divided by the appropriate national standard, before summing to produce a single indicator. A higher score indicates that an area is experiencing relatively higher levels of deprivation.

Based on the IoD 2019 Air quality indicator - North Northamptonshire has lower levels of air pollution (0.888 IoD score) than West Northamptonshire (0.906 IoD score) and lower levels of air pollution than England (0.957 IoD score).
